HTML MULTIMEDIA

OBJECTIVES:

1. Insert images in webpages.
2. Embed video and audio elements.

3. Apply multimedia attributes properly.

IMAGE IN HTML

SYNTAX

```
<img src=“image.jpg”>
```

src = path image
alt = alternate text for the image

SYNTAX

<img src="image.jpg" alt="This is image">

DEBUG

<img src=‘image.jpg’ alt=“This is image”>

IMAGE SIZE

<img src=“image.jpg”>

Add width and **height**

Example:

<img src=“image.jpg” style=“width: 250px; height: 350px;”>

DEBUG

<img src=“image.jpg” style=“width: 250px; height: 350px;’>

VIDEO IN HTML

SYNTAX

```
<video width="400" controls>
  <source src=“video.mp4" type="video/mp4">
</video>
```

HOW IT WORKS?

- Controls attributes adds video controls, like play, pause, and volume.
- You can also customize the width and height.

SYNTAX

```
<audio controls>
<source src="horse.mp3" type="audio/mpeg">
</audio>
```

You can also add muted on the audio
Example:

```
<audio controls muted>
<source src="horse.mp3" type="audio/mpeg">
</audio>
```

THANK
YOU
